

12/03

$$C = \begin{bmatrix} 1 & 2 \\ 2 & 3 \\ 3 & 4 \end{bmatrix} \quad \text{cond} = \begin{bmatrix} 0 & \frac{\sqrt{3}}{2} \\ 0,5 & \frac{\sqrt{3}}{2} \\ 1,5 & \frac{\sqrt{3}}{2} \\ 2 & 0 \end{bmatrix}$$

l'idée est que la matrice K se construit au fur et à mesure.

$$K = \begin{bmatrix} \text{red box} & \\ & | \end{bmatrix}$$

$$K = \begin{bmatrix} \text{red box} & \text{blue box} \\ & | \end{bmatrix}$$

$$K = \begin{bmatrix} \text{red box} & \text{blue box} & \text{black box} \\ & | & \\ & & | \end{bmatrix}$$

$$K = \begin{bmatrix} \text{red box} & \text{blue box} & \text{black box} & \text{blue box} \\ & | & & \\ & & | & \\ & & & | \end{bmatrix}$$

$$K = \begin{bmatrix} \text{red box} & \text{blue box} & \text{black box} & \text{blue box} & \text{yellow box} \\ & | & & & \\ & & | & & \\ & & & | & \\ & & & & | \end{bmatrix}$$
